# why use hand sanitizer

Novel Coronavirus (COVID-19) belongs to the family of Envelope Viruses. This type of Viruses is covered by a Jacket or an Envelope. According to medical researches, Alcohol is proven to kill the virus within seconds of contact.

WHO recommends Alcohol-based Hand Sanitizers as one of the best ways to kill the virus.

Any hand sanitizer that has more than 70% of alcohol is considered as the most efficient.

The Alcohol content in the hand sanitizer will dry your hands, so they are mixed with emollients that softens and moisturizes your hands.

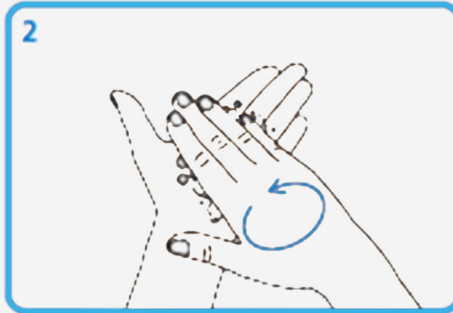

# how to use hand sanitizer

1  
Apply a small amount (about 3ml) of the product

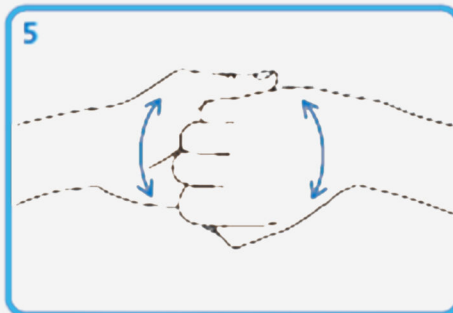

2  
Rub hands together palm to palm, spreading the handrub over the hands

3  
Rub back of each hand and with palm of other hand with fingers interlaced

4  
Rub palm to palm with fingers interlaced

5  
Rub back of fingers to opposing palms with fingers interlocked

6  
Rub each thumb clasped in opposite hand using a rotational movement

7  
Rub tip of fingers in opposite palm in a circular motion

8  
Rub each wrist with opposite hand

9  
Wait until product has evaporated and hands are dry (do not use paper towels)

10  
The process should take 15-30 seconds
